## Personal Profile

---

I am a BSc Business Information Systems graduate from the University of Westminster, with strong IT, interpersonal and communication skills which I've expanded through work experience in retail and web development, exams, coursework and my final year project during university, online tutorials, personal projects, and keeping up with the latest trends in technology.

Ever since finding an interest in IT, I wanted to learn the necessary skills to be a great developer, which includes learning new programming languages, starting off with learning the fundamentals of C++ and Java, and I'm still finding and learning new things to this day. Currently, I am learning more about popular web frameworks like Vue.js, React and Angular, as well as UI/UX design. I decided to take a self-funded training course from Just IT to further expand my skill set by improving existing skills and learning new ones and hopefully obtain a role as a front-end web developer.

I am aiming for a high demanding web development role in a diverse and challenging environment, where I can learn even more skills and gain more experience.

## Education and IT Training

---

09/17-Present

**Just IT Training Ltd, London**  
**Development Professional Programme**

- MTA Software Development Fundamentals (Expected 2018)
- MTA HTML5 Web Application Development Fundamentals (Expected 2018)
- MCS5 Programming in HTML5 with JavaScript and CSS3 (Expected 2018)
- MCS5 Developing ASP.NET MVC Web Application (Expected 2018)

09/13-07/16

**University of Westminster, London**  
**BSc Business Information Systems- 2:1**

**Core Modules:**

BIS Design and Development, Information Systems Strategy, Requirements Analysis, Web Development

**Languages:**

Visual Basic, HTML, CSS, JavaScript, PHP, SQL

## IT Skills

---

**Web Technologies:** HTML5/CSS3, JavaScript, jQuery, JSON, AJAX, PHP, WordPress, Bootstrap, SASS/SCSS, SEO

**Software Development Skills:** C#, ASP.NET, Python, BASIC, Visual Basic

## Personal Projects

---

**Trivia Quiz** - Small quiz with 10 questions in a chosen category, e.g. TV or science, made using Open Trivia API

**HD Graphics Landing Page** - Landing page for small graphics design company in Switzerland, made without the use of frameworks such as Bootstrap

**Blackjack** - Simple BlackJack game with money pot for winnings, made using Deck of Cards API and Web Storage API

## Employment History

---

**02/18-06/18**

**Kession Capital Limited, Colindale  
Front-End Developer**

- Rebuilding Kession's homepage, improving SEO, site performance, while coordinating with employees to decide on functionalities, design choices, content, etc
- Learning how to use WordPress and PHP by creating custom themes to implement website created from scratch using HTML, CSS, JavaScript, jQuery and Bootstrap
- Working on the front end Kession's upcoming tokenised securities platform, improving my knowledge in cryptocurrencies and blockchains that have become a huge trend around the world

**10/16-present**

**Chingford Service Station, Chingford  
Assistant Store Manager**

- Keeping shelves organized, clean, making sure no expired items were available to customers, as well as sharing the workload and splitting up chores appropriately with fellow employees
- Being friendly with customers and being willing to help with their shopping, being calm and patient when serving customers
- Learning how to deal with different situations such as possible drive-offs by constantly making sure customers have payment and legitimate documentation in case of inevitable non-payments

**09/16**

**Aero Lines GmbH, Zurich  
Administrative Assistant**

- Sorting documents and making sure they're ordered correctly and placed in the right folder and communicating with clients and making sure their requirements are correctly defined and analysed
- Organizing work each employee must do, clearly communicate issues with each other, and helping fellow employees with troubleshooting regarding computer systems and software and improving German while talking to clients and employees, speaking more clearly

## Interests and Achievements

---

From a young age, friends and family members said I was very tech savvy, so they always asked me to solve their IT issues. Some of those were easy to solve, like improving usability, but other times required more time and effort, such as removing malware, but I soon figured out the source of the problem and prevent it from happening again.

Previously, I have worked on a small trivia quiz where users can customise the category and difficulty, implementing a trivia API, as well as redesigning Kession's home page and creating a landing page for their tokenised securities platform, using custom and existing WordPress themes.

My hobbies include watching movies, TV shows, finding new art and music, playing video games, reading fantasy and thriller novels, improving programming skills and keeping up with technological advancements.
